

Haymakers pack a punch

Machine Type	RV300	RV390
Working Width (m/ft)	3.00 / 10' 10"	3.90 / 11' 8"
Tractor hp	50hp	60hp
Weight (kg)	357	489
Transport Width (m)	2.50	3.00
PTO Running Speed (rpm)	540	540
Number of Rotors	1	1
Double Tines per Rotor	20	28

Twose's tough and durable combi-rakes come in 3.00m and 3.90m working widths and are suitable for both tedding and raking.

When raking crops, the swath guards form a high, even and fluffy swath. Two wheels under each rotor on the RV-390 allow cleaner raking on uneven ground.

Easy to adjust and maintain, the rakes offer great value for money and can work at speeds of up to 15 kph.

Key features

- 3.00m (9' 10") and 3.90m (12' 10") working widths
- Three-point linkage
- Cost-effective, quality machinery
- Can be set for either a wide and even spread or a high and fluffy swath
- Can be set for raking or tedding
- 10-15 km/h working speeds
- Hardened crown wheels, pinions and driveline

Markets

- Farmers

Tractor requirements

- From 50hp (RV300)
